

For the guests of Sheraton Zagreb Hotel, we offer „Green Program”. A program in which our guests can choose if they would like to have their bed sheets and towels changed. By doing so, our hotel is minimizing in wasting water, detergent and other chemicals that in the end, ends up in wastewaters. We give our guests a special card, which if left on the bed, gives the permission to our house keeping staff to do so. In case the guests do not leave the cards on their beds, we leave them a ‘Thank You’ note, for participating in saving the environment.

Our guests have the option of recycling. With a note that all our guests will see on their room table, we advice to separate their trash, in act of good will, while the non recycling trash can be thrown in the trashcans located in the bathrooms.

Even in the public area of the hotel and meeting rooms, we required special recycling trashcans where our guests can do the good deed for the environment and always be able to recycle.

Our whole staff is involved in the “Green Program” and is always there to help our guests if they have any questions or doubts about what to recycle.

Since 2009 Sheraton Zagreb Hotel takes part in the worldwide movement of people and businesses planning to turn off the lights for Earth Hour, the global environmental awareness event created by the World Wildlife Fund (WWF). Sending a powerful global message about the importance of environmental sustainability and caring for the planet.

In 2011 Starwood Preferred Guest - Starwood's award-winning loyalty program, invited guests to take part in Earth Hour by awarding 100 Starpoints to every member who registers.
